

LAKHVINDER SINGH

Back-End PHP Developer | Full Stack Developer

Brampton, Canada • L.s.dhillon6375@gmail.com • +1 (437) 299-2178 • Lsdhillon.com

CAREER SUMMARY

I'm a Full-Stack Developer with a strong focus on backend development and **2 years of hands-on experience** working with **JavaScript (Node.js, React)** and **PHP (Laravel)**. I have successfully led and **delivered complex projects**, including **CMS platforms, a court booking system, and an event management system**. I thrive on problem-solving and taking ownership of challenging tasks, and I enjoy working on **backend architecture**. While backend development is my primary strength, I am actively expanding my skills in **cloud computing, DevOps, and CI/CD pipelines**.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), PHP
- **Frontend Development:** HTML5, CSS3, SASS, Bootstrap, Tailwind CSS
 - **Frameworks/Libraries:** React.js
- **Backend Development:** Laravel, Node.js, Express, Next.js
- **Databases:** MySQL (design, stored procedures), MongoDB
- **CMS & Platforms:** WordPress (**custom themes, ACF, Gutenberg & Elementor**)
- **Cloud & DevOps (Learning):** AWS (EC2, S3, RDS), Docker, GitHub Actions, Jenkins

WORK EXPERIENCE

FULL STACK SOFTWARE DEVELOPER

[Weblab Solutions](#)

HYDERABAD, IND

Nov 2022 - Jan 2024

- Focused primarily on backend development, handling API integrations and deployments
- Developed CMS for major clients like [Aurobindo.com](#) & [UMPESL.com](#).
- Designed and built a Court Booking System integrated with Gopichand Academy ([gopichandacademy.com](#)) which handles **5,000+ bookings per month**, allowing users to easily book courts and manage their reservations.
- Designed and implemented MySQL database structures, optimizing for performance and scalability.
- Developed an Event Management System as an in-house software solution, handling exhibitors, visitors, and admin functionalities. **This system was sold as a service** to other companies for managing events efficiently.
- Gained experience in project leadership, successfully delivering multiple projects.

KEY PROJECTS

- **CMS Platforms (Next.js + Laravel):** Developed CMS solutions for **Aurobindo.com** and **UMPESL.com** using **Next.js** (frontend) and **Laravel** (backend), supporting multilingual content and dynamic admin tools.
- **Booking & Event Systems**
 - **Court Booking System:** Created with **React + PHP + REST API**, handling **5,000+ bookings/month** for [Gopichand Academy](#) with real-time scheduling.
 - **Event Management System:** Developed in **Core PHP** and later productized as a white-label SaaS for managing attendees and event logistics.

- **WordPress Development:** Built and customized themes, implemented WooCommerce, ACF, CPTs, and shortcodes for tailored client sites.
- **Shopify Customization:** Developed storefronts, integrated third-party apps, and managed product catalogs for optimized e-commerce solutions.
- **Performance & Optimization:** Enhanced speed and SEO with caching, CDN integration, lazy-loading, and optimized assets.
- **Maintenance & Support:** Conducted updates, security audits, backups, and troubleshooting for stable site performance.
- **End-to-End Delivery:** Managed development, QA, deployment, and ongoing maintenance across AWS and cPanel hosting.

PERSONAL PROJECTS

YOUTUBE CUSTOMIZER

BROWSER EXTENSION

A Firefox extension that provides personalized YouTube experience based on user preferences.

DEV ASSIST

BROWSER EXTENSION

Developed DevAssist, a browser extension that unifies REST API testing with AI-powered regex generation and validation—delivering an all-in-one developer toolkit directly in the browser.

EDUCATION AND CERTIFICATION

Web Development Post. Grad Course | Conestoga, Canada

2025

Bachelor of Computer Application | Ryan College, India

2022
